YaraVita™ CROPLIFT PRO™

A fully soluble powder foliar fertiliser containing multiple nutrients and micronutrients for foliar application on grassland during times of stress or periods of rapid growth.

Analysis

20% N

3.5 % P

11.5 % K

5 % S

1.2 % Mg

Plus Boron, Copper, Iron, Manganese, Molybdenum and Zinc

Typical application rate

2 kg/acre (5 kg/ha)

This provides:

N = 0.8 unit/acre

P = 0.14 unit/acre

K = 0.46 unit/acre

S = 0.2 unit/acre

- Highly concentrated nutrient combination – more than just a ‘foliar N’
- Excellent NPK balance with a good S, Mg and micronutrient contribution
- Easy to mix and safe to tank mix with many grassland herbicide products
- Immediate boost for grass under stress – improves sward recovery after period of cold or drought
- Apply on silage crops 4 - 6 weeks before harvest – very effective on low soil P & K index silage fields or where insufficient NPK was applied
- Can be grazed 7 days after application
- Water rate: 80 L/acre (200 L/ha)
- Pack size: 20 kg

2021 YaraVita Croplift Pro trial results on grass - Gloucestershire

17 days after YaraVita Croplift Pro was applied

First application

5 kg/ha applied to half of the field in late April in addition to an application of NKPS solid fertiliser.

- YaraVita Croplift Pro application increased yields by 45%
- ROI – 7.9:1

6 weeks after YaraVita Croplift Pro was applied

Regrowth - 6 weeks with no fertiliser applied

2nd cut mowed late August and baled early September:

- Treated = 22 bales @ 500kg weight per bale vs 17 bales @ 500kg per bale
- Treated half yielded 57% more on the 2nd cut hay crop.
